Objective

A dedicated Health Informatics Specialist with hands-on experience in health insurance, medical coding, and health information management. I aim to contribute to the development and optimization of healthcare systems by applying my expertise in insurance processes, data accuracy, and quality improvement. Motivated by the Kingdom's Vision 2030 for advancing the healthcare sector, I seek opportunities that allow me to enhance operational efficiency, support informed decision-making, and improve patient care outcomes through effective health information and insurance management.
