 Saudi Arabia

OBJECTIVE

I aspire to work in the field of cybersecurity and computer systems maintenance, focusing on identifying vulnerabilities and securing networks effectively. I strive to enhance system performance, implement best practices to ensure stability and data protection, and continuously develop my technical skills to keep pace with emerging technologies. My goal is to deliver innovative and reliable solutions that meet organizational requirements and achieve the highest standards of security and quality.

EDUCATION

Bachelor's Degree in Cybersecurity – Gulf Colleges, Saudi Arabia | May 2025

- Fundamentals of Artificial Intelligence
- Artificial Intelligence Concepts and Advanced Applications

EXPERIENCE

- Cooperative Training – Hafar Al-Batin Municipality | September – November 2024

GARDUATION PROJEET

- Development of a Secure Web Chat Platform using Python and RSA Encryption, with End-to-End Encryption to ensure data confidentiality.
- The server infrastructure was designed to support service stability and prevent message loss, with an access control system based on user roles.
- The project also involved Socket Programming for real-time communication between users and included comprehensive testing to ensure the highest standards of security and performance.

Technical Skills

- Vulnerability Assessment
- Network Security
- Security Policies Implementation
- Computer Maintenance (Hardware/Software)
- Antivirus Software
- Technical Problem Analysis

Personal Skills

- Effective Communication
- Time Management
- Flexibility and Positivity
- Fast Learning
- Attention to Detail
- Self-Discipline

Language

- Arabic
- English
